## About Me

I am ambitious to acquire a position where I can fully utilize my skills and abilities while also experiencing personal and professional growth with experienced senior and enthusiastic colleagues within the organization.

## Internship

- *06-Apr-2023 to 18-May-2023*  
**Work on:** Machine Learning & Data Science with Python  
**At:** PHN Technology Pvt Ltd (Pune)
- *27-Jan-2023 to 26-Feb-2023*  
**Work on:** Web Based Mass Mail Dispatcher  
**At:** Exposys Data Labs (Bengaluru)

## Project

- **Face Recognition Attendance System**  
The system compares the detected faces with a dataset of known faces, allowing it to identify individuals.
- **PMC Data Visualization**  
PMC Data Visualization which involved collecting data on the problems faced by people in their areas related to cleanliness, water, roads, footpaths, and other such issues.
- **Sudoku Solver**  
This is a Python code for creating a Sudoku puzzle using Pygame. It allows the user to fill in cells and checks the validity of each entry. It then solves the puzzle using the backtracking algorithm.
